

How to use Anyconnect VPN as student

How to get the correct client for your OS

(Windows, OSX, Linux)

Open a browser and go to the site: <https://any.sdu.dk>

Login using your student username and password: SDU\username

The screenshot shows a web browser window titled "University of Southern Denmark". It contains a login form with two input fields: "Domain\user name:" with the text "SDU\rumoe07" and "Password:" with masked characters. Below the fields is a button labeled "Access VPN".

Follow to automatic guide, to determine the best way to install the Anyconnect client for your OS.

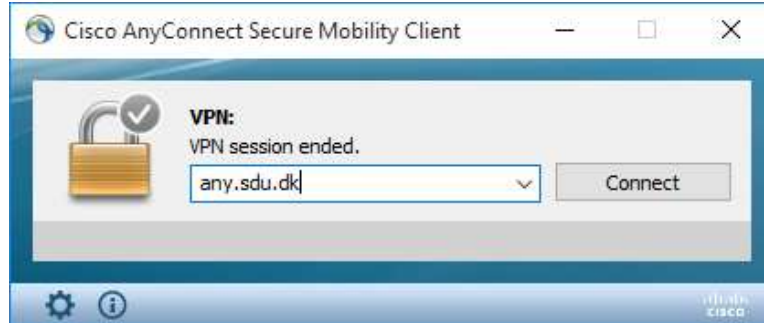

The screenshot shows the Cisco AnyConnect Secure Mobility Client WebLaunch interface. The left sidebar has a "WebLaunch" section with a globe icon and a list of options: "Platform Detection" (checked), "ActiveX" (unchecked), "Java Detection" (checked), "Java" (unchecked), "Download" (unchecked), and "Connected" (unchecked). The main content area is titled "Manual Installation" and contains the text: "Web-based installation was unsuccessful. If you wish to install the Cisco AnyConnect Secure Mobility Client, you may download an installer package. Install using the link below: [Windows Desktop](#). Alternatively, [retry](#) the automatic installation." At the bottom right, there are "Help" and "Download" buttons.

It might determine that you have to download and install the client manually. In that case you have to download the installation package to your computer and run the installation from there.

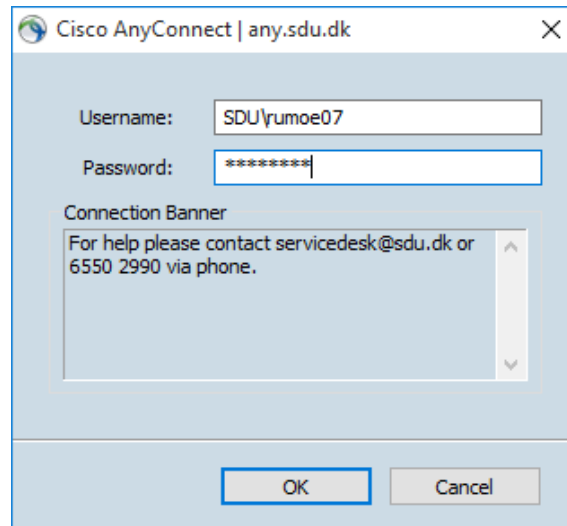

Follow the standard installation for your OS, there are no special settings to change.

Setup the client

After the installation has completed, find the shortcut for Anyconnect, and start the client. In the connect adresse click and write: any.sdu.dk

Press connect, and after a short moment, the client should popup and ask for your credentials. Please use your SDU username and password:

Press OK, and after another moment the client should be connected, as it can be seen on the padlock icon:

Disconnect the vpn

To end the connection, simply right click the icon , and select Disconnect.
