

Action plan – HEALTH

Date: **06.02.19**

Action plan for		
<i>Programme: KA Folkesundhedsvidenskab</i>		
<i>Module: Applied biostatistics</i>	<i>Module coordinator: Gabriele Berg-Beckhoff</i>	<i>Response rate: 29%</i>

Topic	Explanation	Follow up	Timing	Responsible
<i>Response rate</i>	<i>Response rate was low</i>	<i>Remember students to fill in the evaluation form to increase response rate</i>	<i>Next year after the course</i>	<i>Gabriele Berg-Beckhoff</i>
<i>Exercise: interpretation of results</i>	<i>Some students commented that interpretation of the statistical outputs from STATA need to be elaborated.</i>	<i>Next year the instructors will be instructed more clearly to clarify/discuss interpretations. Additionally, further comments will be added in the lecture</i>	<i>Next year when the course starts and during the course</i>	<i>Gabriele Berg-Beckhoff</i>
<i>Confusion about time schedule</i>	<i>We shifted some lectures together with health measurement scale. This was done to allow the students a longer Christmas holiday. However, some students were confused about the new time schedule</i>	<i>This will be omitted next year</i>	<i>Next year when the course starts again</i>	<i>Gabriele Berg-Beckhoff</i>
<i>Nice information: Around 75% or more of the students agreed, that the objective was clear, that they were encouraged, and that they got feedback. They were satisfied about the relevance, time table, and e-learning. Two of the instructors were personally complimented for their good work as instructor The external lectures was also mentioned positively. It was a difficult topic, but the teaching was done interesting and good.</i>				<i>No action needed</i>
