

Action plan – HEALTH

Date: **10.07.19**

Action plan for Advanced Epidemiology		
Programme: Master of Science in Public Health		
Module: Advanced Epidemiology	Module coordinator: Module coordinator	Response rate:41,3%

Topic	Explanation	Follow up	Timing	Responsible
Smaller groups in the obligatory task	The students mentioned that the groups were too big to work together	Allow smaller groups	Next Year	Module coordinator
Doubling topics from the Bachelor teaching at SDU	There was a big part of students that were satisfied with the teaching content (50 to 60%), but also a group of students that mentioned an overlapping of teaching topics given the Bachelor course in Public health at SDU	A course check will be done to compare Bachelor and Master courses to adjust this course	starts in August	Module coordinator, Xx
Misunderstanding of Exercises	The students marked that exercises were difficult to understand	Language check of the exercises	Next year	Module coordinator
Very good evaluation of guest lectures and instructor	-	Keep	Next year	Guest lecture, instructor
Good structure of e-learning and study guide	-	Keep		-
Some student remarks mentioned to miss the structure	Even though nearly 80 to 90% of the students believed that study activities were nicely presented, and practical issues has been available through e-learn, some students mentioned to be confused	Follow up of students during next period to find out where they were lost	Next year	Module coordinator
Confused teaching	A minor part of students remarked confused teaching	Check of teaching material	Next year	Module coordinator
My own concern	None of the students that criticized overlapping teaching topics and missing structure of the course came to me during the course.	Need to build up trust that questions and comments can be made during the lecture period	Next year	Module coordinator
