

Action plan – HEALTH

Date: **12.04.2019**

Action plan for	
Programme: <i>Master of Science in Public Health</i>	
Module: <i>Risk theory, assessment and governance</i>	Module coordinator: <i>Gabriele Berg-Beckhoff</i> Response rate: 26,3

Topic	Explanation	Follow up	Timing	Responsible
<i>Low response rate</i>	<i>Low response rates leads to the fact that some points are criticized only by one student. It is difficult to know if this is an individual opinion or if this is a major concern</i>	<i>More effort to increase the response rate</i>	<i>Next year</i>	<i>Gabriele</i>
<i>Missing feedback</i>	<i>One student was not satisfied with individual feedback even though others mentioned that it was good.</i>	<i>The teacher gave feedback during lectures/exercises. It might be that students who did not participate corresponding lecture, did not experience feedback. It is important to tell the students that feedback is connected to teaching hours.</i>	<i>Next year</i>	<i>Gabriele</i>
<i>Choice of one irrelevant exercise</i>	<i>One exercise (about Project management) was pointed out to be irrelevant.</i>	<i>Particular this exercise was decided to add some years before due to wishes from students. Of course, It can be dropped once again, however, I would like to keep it and observe if there are more students who do not like this exercise</i>	<i>Next year</i>	<i>Gabriele</i>
