

# Action plan – HEALTH

Date: **29/11/2018**

Action plan for					
<i>Programme: MSC. In Public health research</i>					
<i>Module: Public health research on global scale</i>				<i>Module coordinator: Gabriel Gulis</i>	<i>Response rate:23-35% (done twice accidentally)</i>
Topic	Explanation	Follow up	Timing	Responsible	
<i>Hard exam</i>	<i>There was a slight complain that the exam is too much work and hard for the level</i>	<i>I will add more clarity and examples to present the exam</i>	<i>Before September 2019</i>	<i>Gabriel Gulis</i>	
<i>Content and aims of the module</i>	<i>Few students were not fully clear with the relation between aim, content and form of exam</i>	<i>Will focus on this element more in next run of the module</i>	<i>Before September 2019</i>	<i>Gabriel Gulis</i>	
<i>Live meetings</i>	<i>One respondent s mentioned a need for kind of introductory meeting. Moreover, from relatively poorer exam performance I feel the need to add more in person contacts, though it might be due to natural cohort differences</i>	<i>Will increase the number of live online lectures and consider an opening onsite lecture in classroom</i>	<i>Before September 2019</i>	<i>Gabriel Gulis</i>
