Study Abroad
UNIVERSITY OF SOUTHERN DENMARK

Why Study Abroad?
- Economic support
- International days
- Partner Universities
Get support

Start your preparation early

sdu.dk/studyabroad
Why Study Abroad?

Education is not restricted to the classroom. Life experience and personal development are just as important as passing exams on the road to success. Combine all three and study abroad.

Go International! Go Abroad!

Just do it
See the world, make new friends, and broaden your horizons. Stand out and have an education and experience for life. What’s holding you back?!

Nothing to lose, everything to gain
Home will always be there, no matter how far you roam. But you will return with so much more than your education.

New perspectives
You will meet new cultures and people with a very different background than you. You will make friends for life, and gain an international network you can use in the future. You will learn to cope with unfamiliar situations and learn a lot about your tolerance, your insight and yourself.

Improve your employability
“International Experience” is frequently asked for in job descriptions. With a study period abroad you will equip yourself with a range of skills and experiences while gaining a much sought after international profile.

A result of all the experiences and skills that you will develop and/or improve while being abroad is that your study abroad period becomes a significant asset on your resume. Several studies have shown that employers rate a period studying abroad important, when looking at applicants.

SDU University of Southern Denmark  sdu.dk/studyabroad
How to get started

When planning to study abroad it pays off to start your preparation early! The application process takes time depending on where you want to go, but your efforts will be worth it.

Get support
The University of Southern Denmark has more than 500 exchange agreements around the globe! Exchange studies are tuition free, but you will have to cover travel and living expenses yourself – however, SDU will assist you with a travel grant based on the exchange program that you participate in. You can also support your study abroad period by applying for private grants and scholarships.

Conditions
You can go abroad as part of your studies both on your Bachelors and Masters – but you will have to have completed at least 3 semesters of your studies before departure. Your study abroad needs to be credit bearing – meaning that you can transfer credits to your degree.

Preparation
You will need to start planning your study abroad period about 1-1½ years in advance depending on where you want to go, and with which program.

Credit transfer
You will have to plan your study program so that you ensure you follow courses that have the appropriate level and workload. You should ask the academic advisor at your Faculty for advice on this.
What are your options?

Go on an Erasmus+, Nordplus or one of SDU’s overseas exchange agreements or do an internship abroad

Study abroad on an exchange agreement
If you travel with Erasmus+, Nordplus or on one of SDU’s overseas exchange agreements, an exchange place is reserved for you. Tuition is free and the host university often helps with accommodation and reception.

In Europe
With the Erasmus+ or Nordplus exchange program you can study within the EU as well as Switzerland, Turkey and our Nordic neighbor countries in Scandinavia.

Application deadline is November 1st for the following academic year.

Overseas
SDU also has a number of exchange agreements in Australia, Brazil, Canada, China, Indonesia, USA, Venezuela and many, many more countries! SDU International can help you with the application process as well as guidance with the visa, vaccination process etc.

Application deadline is November 1st for the following academic year.

Do an internship abroad
If you find an internship outside of Denmark, it can be both Europe and overseas, SDU International can help you with guidance about your credit transfer, the paperwork as well as allocating a grant to help with the extra expenses.

Application deadline is 1 month before the internship.

Do your lab-work, clinical stay or fieldwork elsewhere
If you get the pre-approval from your study board, SDU International can help you with guidance to handle the paperwork, visa, vaccinations as well as providing you with a grant to cover extra expenses.

Do a self-arranged stay outside of SDU’s network
If you travel on a self-arranged stay you will have to finance and plan the stay on your own.

If you cannot find an exchange place suiting your needs through SDU, you have the option to arrange your study abroad yourself. The advantage is that you can choose freely where and when you want to go, which gives more flexibility. The disadvantage is the risk of a lower quality experience outside of SDU’s network and you will have to do much of the planning yourself. You can apply for the Study Abroad Scholarship, at the SU office at the student service to help cover your tuition fee. (If you are eligible for SU grant and Loan Scheme) Often you must finance a smaller portion yourself.

Prepare to plan ahead – and start your preparations 1-1½ years before you want to go abroad.
Economic support

Grants and SU will finance your study abroad period

Travel grant
If you are elected for an exchange place abroad through SDU International, you will automatically receive a travel grant either from the Internationalisation Fund, the Erasmus+ programme or Nordplus. The grants awarded will typically cover travel expenses and a little extra.

Internationalisation Fund
The SDU Internationalisation Fund will support internships and short term stays. Read more on-line at MY SDU, Study Abroad.

Grants and scholarships
You can also apply for private grants and scholarships, and sometimes this might be necessary to cover all expenses.

Udlandsstipendium
If you arrange your own study abroad stay you can apply for ‘Udlandsstipendium’ via SU. See more at MY SDU, Study Abroad.

SU
If you receive SU and/or SU loans, this will continue during your study abroad period.
International Days and information meetings

Every year we organise several events to promote international exchange and to inform you about your opportunities to go abroad.

**Let’s start dreaming about an international experience!**
We live in a globalised world and there are so many things to learn, experiences to make and friends to meet by going abroad during your studies. Are you curious about which adventures might be waiting for you? Then come to one of our International Days, in Odense or Sønderborg or one of the information meetings held each semester on all campuses, and have a chat with us and former exchange students who want to share their stories with you.

**Fulbright Program**
Learn more about grants offered by the Fulbright Program for studies in the US.

**Use your international skills for your career by SDU RIO (Career Center)**
Learn how to develop your professional skills and qualifications through your experiences abroad.

**What is an information meeting?**
An info-session hosted by SDU International – about your options for going abroad and how to go about it.

**When?**
Information meetings during February; information meetings and International Days in September/October.

**Where?**
Check the list of information meetings on-line at MY SDU, Study Abroad, to see when and where.

**What is International Day in Odense / Go Abroad in Sønderborg?**
Information market about possible destinations. Meet students who have already been on an exchange or students from partner universities.

SDU International will give a presentation about your options and how to prepare and finance your studies or internships abroad.

Go to our website to see which universities are available to students from your study programme.
Just get out there
My advice to other students is that you should definitely study abroad. Just get out there. Grab the chance. Even if you don’t really want to now because it’s out of your comfort zone, it will be worth it! You both grow your network and you grow as a person. Seeing the northern lights was probably the most amazing nature experienced I’ve ever had.

You have to give a lot, to get a lot
It’s really hard for the first few weeks. You really have to keep yourself in check and force yourself to go to social activities. Go to eat with others and dance tango even if you don’t feel like it. You have to give a lot of yourself to be a part of a community. And it is difficult, because you want to stay at home, because you’ve traveled away from your comfort zone. You’ve traveled to a place where you don’t know anyone. But you have to open up, because then others will open up to you too.

Supportive university
At the university I felt really supported. They arranged so much to make us comfortable. In the dark months, there were even light cafes in the morning! And we received mails once a week about what was going on if we wanted to do any activities. I never felt alone.

Contacts around the world
One of the great things about studying abroad is that you get tons of great contacts from around the world. There is always someone you can talk to. If you’re in another country you can contact them and ask them to meet up. So that’s a big advantage, you get contacts around the world.

Going back to do field work
I was lucky enough to get the option to do my field work with Tromsø University. I study arctic marine biology, so I thought, where better to be than in the arctic? It would certainly be difficult to do my field work in Denmark. I asked one of my professors in a course during my exchange if he could use a master’s student from Denmark. And he said yes. So when it’s time for my master’s thesis I will be going back to Tromsø to do all my field work there, and then I’ll write my thesis in Denmark with a Danish professor. It’s so exciting!
Western Europe

Students from all over the world
Heidelberg, it’s a great city to study in. The city is very international and full of students from all over the world. It’s especially fun to study physics here because so many people study physics, which isn’t usually the case. I also really like that it’s an old beautiful city with lots of nature, so I can bike out to a mountain and go rock climbing.

Conservatism – difficult but funny
Something which has been kind of funny but also difficult is that the education is very conservative in Germany. The university is very old fashioned. They sure like their papers, forms and signatures. But it’s not such a problem. You just get through it and it all works out.

Great experiencing new things
One of the things, I think is really great about studying abroad is that you get away from your usual environment and you get to see another way to live and another way to study.

From mta.ca

Stand out in the crowd no matter where you sit.
We like to call it the small class difference — but what it boils down to is the opportunity to ask questions, the confidence to share your ideas, the freedom to be yourself, and everyone (including your professors) knowing your name. The small class difference can be found in each classroom, lab, studio, and stage across campus. It’s safe to say you won’t get lost in the shuffle at Mount Allison.
