## 4. Download from 'Resources'

1.

Students can select folders or multiple resources and download them all as one .zip file. Note that at this moment only actual files, such as PDFs or Office documents placed directly in resources, can be downloaded. Files placed in a 'page' resource are not possible to download.

2.

Students will see checkboxes in front of each resource and a 'Download' button. Clicking the button will generate a .zip file with the supported resources included. It can take some time before the .zip file is ready.

3.

The user can wait or continue working. We will send a notification when the .zip file is ready. Note that after 24 hours the .zip is removed but can be regenerated. The student is responsible for checking that the requested files have been included in the downloaded .zip file.
